Project

GYM WEBISTE

Using React and Third Party Libraries of react like-React-icons , Recoil . For Styling Design Used Module CSS Used in React .
Also used Login and Signup Validation And stores data in localStorage .

Twitter Clone

I utilized React JS and the Material UI library to design the frontend of a Twitter website. Additionally, I incorporated the functionality of posting tweets, liking them. The website is also responsive like real twitter.

Kanban Board

I utilize React Beautiful Dnd in our app to make a draggable and dropable task in kanban board.
Using React and Third Party Libraries of react like-React-icons , Redux , Redux-persist ,React beautiful DND.
